Energy certification in Europe:
Issues and Experiences

Tuesday 13th of October 2009

Rhône-Alpes Region Head Office // Charbonnières-les-Bains - FRANCE

// Simultaneous translation

With the support of:

RhôneAlpes Région

RHONALPENERGIE
Environnement

RHÔNE-ALPES
A NEW DYNAMIC FOR CLEAN TECH
ACCÉLÉRATEUR D'ÉCO-INNOVATION

The event :

A day of sharing experiences on the housing certification of high energetic performance: **new and renovation.**

Presentation of practical cases :

- Exemplary realizations, challenges ;
- How to incite the customers and the project owners to go towards the certification ?
- European benchmark in Germany (Northrhine - Westphalia) and Italy (South Tirol).

General context :

The European directive on energy efficient buildings implies that the Member States have to implement energy performance certificates for rent or sold houses and improve the energy performances of new or renovate buildings. The certification appears as one of the main controls levers in order to increase the implementation of these regulations and even further, in terms of requirement and performance.

The **Cluster Rhône-Alpes Eco-énergies** invites other European clusters as well as his members and partners in Rhône-Alpes and in France to focus on the state of progress of certification in the various territories and think about the first experience feedback.

This event is certified by the European Commission as an **OPEN DAYS 2009** decentralized event.

Place :

Région Rhône-Alpes / salle de délibérations / 78 route de Paris
Charbonnières-les-Bains / FRANCE

Agenda:

* 9h30 – 12h30: New housing

- Opening session by **Hélène Blanchard** – Vice-president of environment and energy
- Grenelle Environmental Charter and the impact on the energy performance requirements for new and renovated buildings: **Hakim Hamadou** – ADEME Rhône-Alpes
- Interest and main issues of certification: **Catherine Bondouau** – EFFINERGIE
- First feedback on certified housing, point of view of a certifier: **Alain Hutin** – CERQUAL
- Energy efficient houses certified: **Laurent Beaugiraud** – VILLA SOLEIL
- The crucial role of the Project Manager team- 6 social housing in La Terrasse(38): **Vincent Rigassi** – Architect
- The dynamics of the certification « Casa Clima » for the individual house in South Tirol: **Dr. Maria Giulia Faiella** – TIS Innovation Park, South Tirol, Italy

* 12h30 – 14h: Lunch

* 14h – 17h: Renovation

- Issues and context of the rehabilitation level Effinergie in the collective housing: **Laurent Chanussot**– Rhônalpénergie-Environnement
- The support provided to project owners to produce high-performance buildings through renovation: **PREBAT and FEDER** – **Hakim Hamadou** ADEME Rhône-Alpes
- Round Table:
 - The choice of the project owner to go further: social housing in Lyon **Eric Perron** – Grand Lyon Habitat
 - Three examples of insulated houses with low consumption: **Samir Boukhalfa** – Agence Locale de l'Énergie du Grand Lyon
 - Concept “Solar Energy Housing Estate” applied to the rehabilitation of housing in Germany, **Andreas Gries** – Agency of the energy North Rhine – Westphalia
- Conclusion: **Jean-Jack Queyranne** – President of the Region

Open Days 2009
